# Chaitanya Tejaswi ❷₀in₀Đ₀®

## **Summary**

An Electronics & Communication (EC) graduate with a demonstrated exposure in Embedded Systems, Image Processing, and Python-based development; I am currently looking for an opportunity in similar domains.

I have worked extensively with - AVR/ARM microcontrollers, implementing source codes in ASM/C; OCR & QR Codes in addition to conventional image processing; Python3 for creating GUIs & shell utilities, web applications (using Flask/Selenium), and machine learning scripts (using SciPy stack).

I'm open to all software development roles.

#### **Education**

June 2014 - Jun 2018 Birla Vishvakarma Mahavidyalaya, Vallabh Vidyanagar (GTU)

• Completed Bachelor of Engineering (B.E.) in Electronics & Communication with a CGPA of 8.35.

June 2014 OSEM High School, Morbi

• Completed HSC from CBSE Board with an aggregate of 80.2%.

June 2012 Delhi Public School, Gandhinagar

• Completed SSC from CBSE Board with a CGPA of 9.8.

**Experience** 

March, 2018

2018

June, 2020 Less Typing, More Thinking [DEMO] [INFO]

A web utility to lookup Latex code for extensively used Maths equations. (CERN WebFest, 2020)

 Wrote scripts to scrape & parse Tex equations from two datasets (~400 & ~18,000 entries respectively).

respectively

ISR3 [DEMO] [INFO]
A web utility to extract text from community assets' images. (Smart India Hackathon, 2018)

 Led a team of 6; Wrote scripts to extract location from EXIF files, and pre-process & binarize images. Also, created an original dataset for testing.

## **Publications & Invited Talks**

15 June, 2020 Unboxing GitHub [SLIDES] [VIDEO]

A talk for academics, with focus on basic GitHub features, and how to use them to create effective

lecture notes.

21st April, 2020 Creating eBooks from Webpages using Python [SLIDES] [VIDEO]

A talk to get you started with web scraping in Python using minimal external dependencies. We will write

a script that scrapes online court judgments and creates Android/Kindle compatible ebooks from them.

A Novel Approach of Tesseract-OCR Usage for Newspaper Article Images

(Chaitanya Tejaswi, Bhargav Goradiya, Ripal Patel; Journal of Computer Technology &

Applications. 2018; 9(3): 24–29p.)

A novel approach for optical character recognition of newspaper article images (captured as smartphone camera images) is presented, with evaluation based on two sets of images; both captured

using the same camera, under varying lighting conditions.

#### **Projects (Academic)**

April, 2018 Pico-Projector based Automation

Guide: Bhargav Goradiya, BVM VVNagar

 Implemented Classroom Automation (for teachers) using DLPDLCR2000EVM pico-projector module & Raspberry Pi 3B as server.

October, 2017 OCR-based Personal Assistant

Guide: Bhargav Goradiya, BVM VVNagar

 Implemented a text extractor & text reader module for newspaper article images using Tesseract OCR & OpenCV, implemented in Python. April, 2017 QR Code-based information system using QPython3 IDE on Android devices

Guide: Kaushal Patel, BVM VVNagar

• Wrote sample codes for automation using QR codes.

October, 2016 GSM Communication with AVRµc

Guide: Anish Vahora, BVM VVNagar

• Implemented serial communication between AVRµc (ATmega32) & GSM Module (SIM300).

April, 2016 Filter Implementation using MATLAB

Guide: Robinson Paul, BVM VVNagar

• Implemented lowpass and bandpass filters in MATLAB as an application of Sampling Theorem.

April, 2016 Keypad & ADC/DAC Interfacing with 8085µp

Guide: Bhargav Goradiya, BVM VVNagar

Interfaced 4x4 keypad & ADC/DAC (0800/0808) with Intel 8085μp using 8255 PPI.

October, 2015 Mod-100 Counter

Guide: Anish Vahora, BVM VVNagar

Implemented a Mod-100 Counter using IC-7490 (Decade Counter) & IC-74248 (BCD to 7-segment Decoder) that loops through 00-99.

# **Projects (Personal)**

June, 2020 - API

Personal collection of static APIs.

• Automated chores using JSON files.

#### **Skills**

Languages (Programming) Languages (Spoken) Software Stack PowerShell, Python, C/C++, ASM (AVR, x86), HTML/CSS/JS.

English, Hindi, Gujarati.
Python (SciPy stack, OpenCV, Flask, Selenium).
